Understanding climate stewardship

“Stewardship entails a profound understanding and acceptance of the challenges that result from the organization's interdependence with the societal and ecological contexts in which it operates and embracing the challenges to be a force for building a viable future. “

Corporate Stewardship, Achieving Sustainable Effectiveness (2015)

Understanding climate stewardship

Carbon
Management

Climate
Stewardship

Measure & disclose

- Measure and disclose the climate impact and risks.

Reduce

- Take action to reduce the company's climate impact (in line with science) and its associated risks.

Influence

- Act as an agent of change in the construction of a zero carbon resilient economy

Measure &
disclose

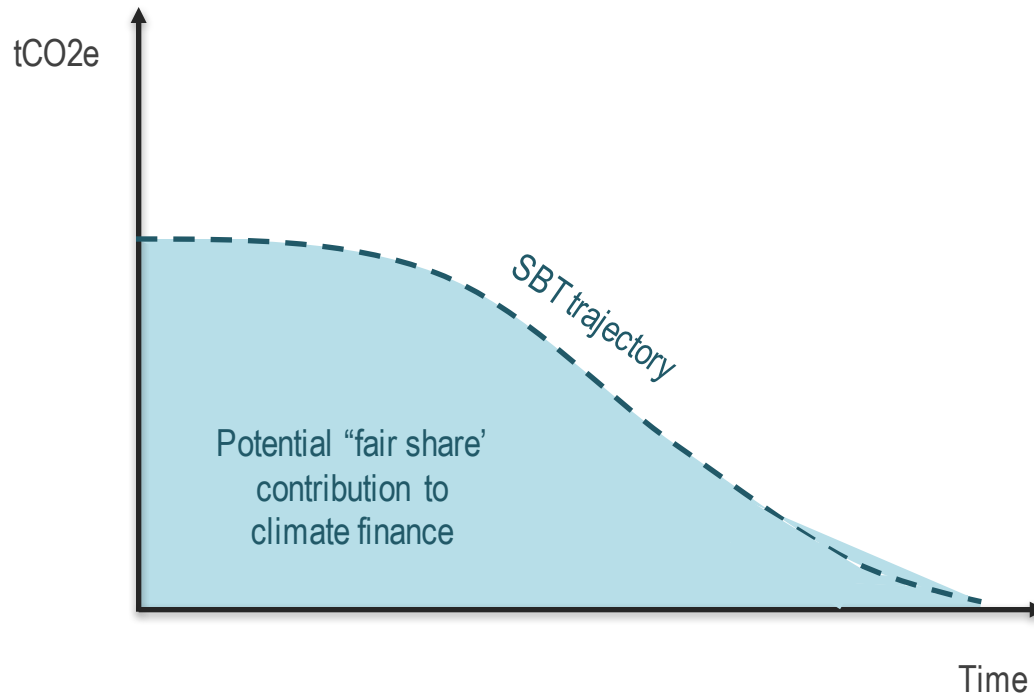

Reduce

Finance

Measure & disclose

The consumption of electricity and its associated climate impacts

Reduce

Reduce the consumption of carbon-generating electricity **and/or** the carbon intensity of the electricity consumed in line with a 1.5°C / < 2°C trajectory.

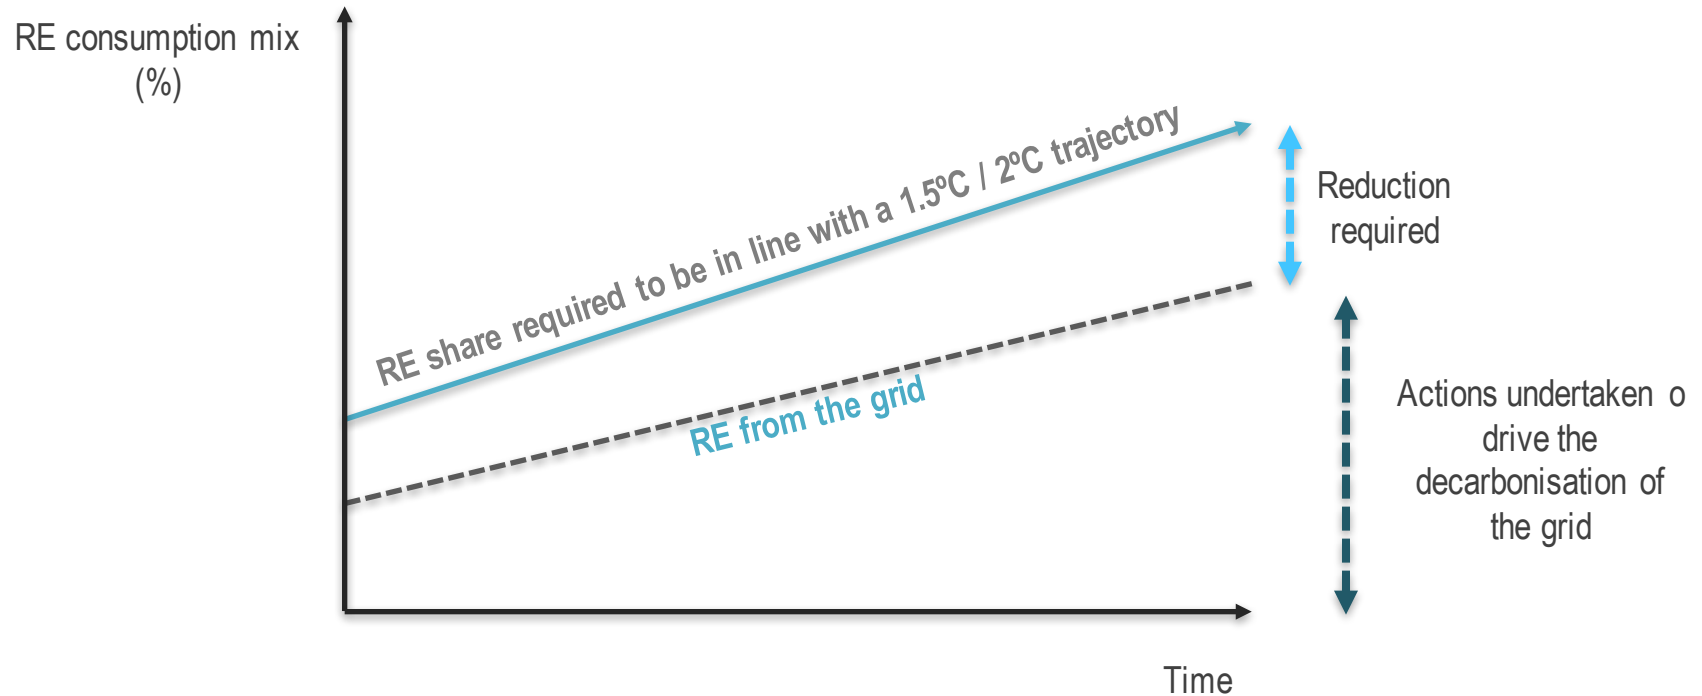

Drive

The decarbonisation of the grid:

- a) Market instruments that lead to additional RE
- b) Engagement in RE policy making processes
- c) Financing

Climate stewardship: transformation of the power sector
